ANDRYAN DURAI JEBIN

Backend Developer & AI Engineer

andryandurai@gmail.com | +91 99448 52361|Chennai,India|Portfolio | LInkedin| Github

PROFESSIONAL SUMMARY

Backend Developer & AI Engineer with hands-on experience building AI-powered and end-to-end software applications using Python, Django, React, PostgreSQL/Supabase, machine learning, NLP, and LLM integration. Experienced in developing practical solutions that combine AI with modern web technologies, with a strong focus on solving real-world problems through scalable and user-focused applications. **AI Intern at Rajalakshmi Engineering College**, with experience in AI/ML and software development. 3× Hackathon Winner and SIH Internal Round 2026 Winner, with a **national-level project developed for NIEPMD**. Completed 6 Consultation Projects.

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, TypeScript, SQL
Frontend: React, HTML5, CSS3, Bootstrap, Component-Based UI Development
Backend & APIs: Django, Django REST Framework, REST API Design, JWT Authentication, Django Channels, WebSockets, Meta WhatsApp Cloud API
Databases: PostgreSQL, PostGIS, MongoDB, MySQL, Supabase (PostgreSQL, Storage), SQLite
AI / ML: Machine Learning, NLP, Generative AI, LLM Integration, Prompt Engineering, AI API Integration, NumPy, pandas
DevOps & Tools: Docker, Git, GitHub, Render, Vercel, VS Code Extension API

EXPERIENCE

NIEPMD, Chennai|Backend Developer & AI Engineer *2026 – Present*

- Developing EchoSense AI - an AI-based tinnitus assessment, sound-therapy and doctor-consultation platform (winner, Smart Ability Hackathon 2026) - now under deployment at NIEPMD (National Institute for Empowerment of Persons with Multiple Disabilities).
- Built the React + TypeScript front end (interactive 3D ear viewer, clinical audiogram, in-browser sound therapy) and the Django REST backend with JWT auth, clinical-data interoperability and an ML prediction engine across seven modules; deployed on Render.

Kuttykoncepts (via Rajalakshmi Engineering College) **| Generative AI & Prompt Engineering Intern** *Jun 2026 – Present*

- Producing AI-generated videos and study materials - transforming complex concepts into engaging, structured, and visually appealing learning content.

Gocourse Pvt Ltd | SEO Intern *July 2026 – Present*

- Performing SEO activities to improve website visibility, organic search rankings, and search engine discoverability.
- Conducting keyword research and optimizing website content, headings, meta titles, descriptions, and onpage elements.

Spatial Infrastructures | Web Development Intern *Febr 2026 - Mar 2026*

- Developed a Flask-based order tracking and audit management system with role-based authentication, centralized dashboards, and order-status workflows. Implemented automated audit logging, soft-delete/restore, CSV export, filtering, and delivery alerts for efficient record and operational management.

PROJECTS

SEVPS - Smart Emergency Vehicle Priority System *| Django · DRF · Django Channels · PostgreSQL/PostGIS · React · Docker*

- Real-time platform giving ambulances traffic-signal priority, fastest routing over PostGIS spatial data and live hospital readiness tracking; admin/driver/paramedic/hospital dashboards with WebSocket live updates, push notifications and explainable ML estimators

SHN - Self-Healing Network *| React · Django REST · Django Channels · PostgreSQL · Docker*

- Observe → detect → diagnose → heal → summarise loop for network failures: background ticks reroute traffic via graph shortest paths, live telemetry streams over WebSockets to a topology dashboard and operator portal, and a template/LLM layer explains incidents.

CLICK - Programming Using C Learning Platform *| JavaScript · Supabase · Cloudflare Workers · VS Code Extension API*

- C-learning platform (microlearning, tests, progress tracking) for college students, shipped as PWA, Windows .exe and Android .apk plus a TypeScript VS Code extension for in-editor practice; Supabase Postgres/serverless backend with session auth on Cloudflare Workers

RAGScope - Casual Failure Attribution & Self-Healing for Agentic RAG *| React · TypeScript · Django REST · PostgreSQL · pgvector· Redis*

- Research platform that traces and analyzes Agentic RAG failures across retrieval, evidence, claims and citations, using dependency graphs and persistent execution traces.
- Supports reproducible fault injection, causal diagnosis, counterfactual testing, targeted self-healing, independent verification, benchmark evaluation and real-time observability.

Academic WDB - WhatsApp-Based Academic Resource Bot *| Django REST · React · TypeScript · Supabase · Meta WhatsApp Cloud API · Docker*

- Students message a WhatsApp number and instantly receive notes, videos and reference links for any subject/semester/department; regex-first intent matching with Groq LLM fallback, JWT-secured DRF API, Supabase Postgres + Storage, React admin panel; Dockerised.

GramSentinel - Multi-Agent Rural Health Warning System *| React · TypeScript · Django REST · PostgreSQL · Django Channels· WebSockets*

- Multi-agent rural healthcare platform connecting ASHA/health-worker observations with community-level early-warning intelligence, combining individual RuralCare decision support, multi-source signal correlation, deterministic safety verification, real-time dashboards and human-led investigation for villages such as Manikkampatti.

ACHIEVEMENTS

• **Winner - Smart Ability Hackathon 2026** (REC × NIEPMD, EchoSense AI) · **Winner - Smart India Hackathon Internal Round.** · **Winner - Flagship KuttyKoncepts AI Hackathon**
• **AI NEXUS 2026**— presented internship work at the AI Innovators Expo to Dr. Kumar R, Hon'ble Minister for AI & IT, Tamil Nadu.
• **Speaker** — Hackathon Awareness Session 2026 (guest speaker, REC) · CLICK: Student Platform Introduction and Usage Session (REC)

EDUCATION

B.Tech, Artificial Intelligence & Data Science *2024 – 2028*
Rajalakshmi Engineering College (Anna University) *CGPA - 8.19*

HSC *2024*
The New Indian School, Bahrain
